Work Experience

Senior Front-end Developer

Cloud Nine AB - Stockholm, full remote

- · Worked in a software house environment, delivering front-end solutions for clients across the Nordics.
- Independently planned, designed, and developed front-end projects from scratch, covering both technical implementation and UX considerations.
- · Conducted technical interviews and assessments for prospective front-end developers.
- · Consulted directly with clients to gather requirements, provide technical guidance, and align project goals.
- Managed and organized project workflows, including writing user stories, creating tickets, and prioritizing tasks for the front-end team.
- Supported the company's expansion into Poland by providing insights into local hiring practices, taxation, and market conditions, serving as the first Polish hire and a key resource in setting up regional operations.
- Technologies and tools: Next.js, Remix, React, TypeScript, styled-components, Tailwind CSS, Git, Jira, Bitbucket, ClickUp
