Work Experience

Aug 2025 — **Senior Front-end Developer**
A5 Labs — United States, fully remote

- Planned and delivered front-end initiatives in an AI-first product environment, taking ownership from ambiguous requirements and early technical decisions through implementation and production release.
- Collaborated across product, design, AI and engineering teams to define requirements, resolve edge cases and align scalable technical solutions with broader product goals.
- Built and evolved reusable components, shared front-end architecture and design-system foundations across internally owned applications.
- Technologies and tools: Vue.js, TypeScript, Web Components, Lit, Vite, Pinia, Tailwind CSS, Radix Vue, Node.js, Git, Bitbucket, Jira, Figma

Jul 2025 — **Senior Front-end Developer**
Cloud Nine AB — Stockholm, fully remote

- Delivered front-end projects for clients across the Nordics, independently owning technical planning, implementation, UX considerations and delivery from initial requirements through release.
- Consulted directly with clients, translated business needs into technical solutions and managed front-end workflows, including user stories, ticket creation and task prioritisation.
- Conducted technical interviews for prospective front-end developers and supported the company's expansion into Poland as its first Polish hire, providing guidance on local recruitment and operating conditions.
- Technologies and tools: Next.js, Remix, React, TypeScript, styled-components, Tailwind CSS, Git, Jira, Bitbucket, ClickUp

Sep 2021 — Aug 2021 — **Front-end Developer**
Genesis Global Ltd — Malta / Gdańsk, Poland, hybrid

- Developed and maintained internal online casino platforms, delivering high-performance, user-focused front-end solutions for the iGaming industry.
- Built an internal React-based data management platform with a focus on scalability, maintainability and performance.
- Led the modernisation efforts of legacy front-end applications from traditional JavaScript implementations to React and Next.js.
- Collaborated closely with design and product stakeholders to deliver consistent UX across established products.
- Technologies and tools: HTML5, SASS, React, Redux, Next.js, Git, Jira, Bitbucket

Mar 2019 — Feb 2019 — **Front-end Developer + Designer**
Spectrum Brands UK Ltd — Manchester, United Kingdom

- Owned the design and development of a new Russell Hobbs website, including front-end architecture, UX implementation and integration with the existing CMS platform.
- Built a scalable front-end foundation to support the company's planned transition into e-commerce and future digital growth.
- Combined development and design responsibilities by producing digital campaign assets, newsletters, banners and advertisements aligned with brand objectives.
- Technologies and tools: HTML5, SASS, Vue.js, ES6, Bootstrap, jQuery, Laravel, Velocity.js, Adobe Creative Suite, Bitbucket

Oct 2017 — Sep 2017 — **Web Developer + Designer**
Cocogreen UK Ltd — Manchester, United Kingdom

- Designed and developed two company websites, Cocogreen and Zoobedding, delivering modern, responsive front-end solutions aligned with brand identity.
- Developed an in-house JavaScript-based solution to automate the generation of technical drawings in PDF format, significantly improving internal workflow efficiency.
- Designed and produced marketing materials, including banners, newsletters, and digital advertisements, to support marketing initiatives and brand promotion.
- Technologies and tools: HTML5, SASS, Bootstrap, jQuery, Velocity.js, jsPDF, Adobe Creative Suite

Jun 2016
